FLUTTER COURSE · SCREEN DESIGN FOR THE PAWS & HOMES PRACTICE PROJECT

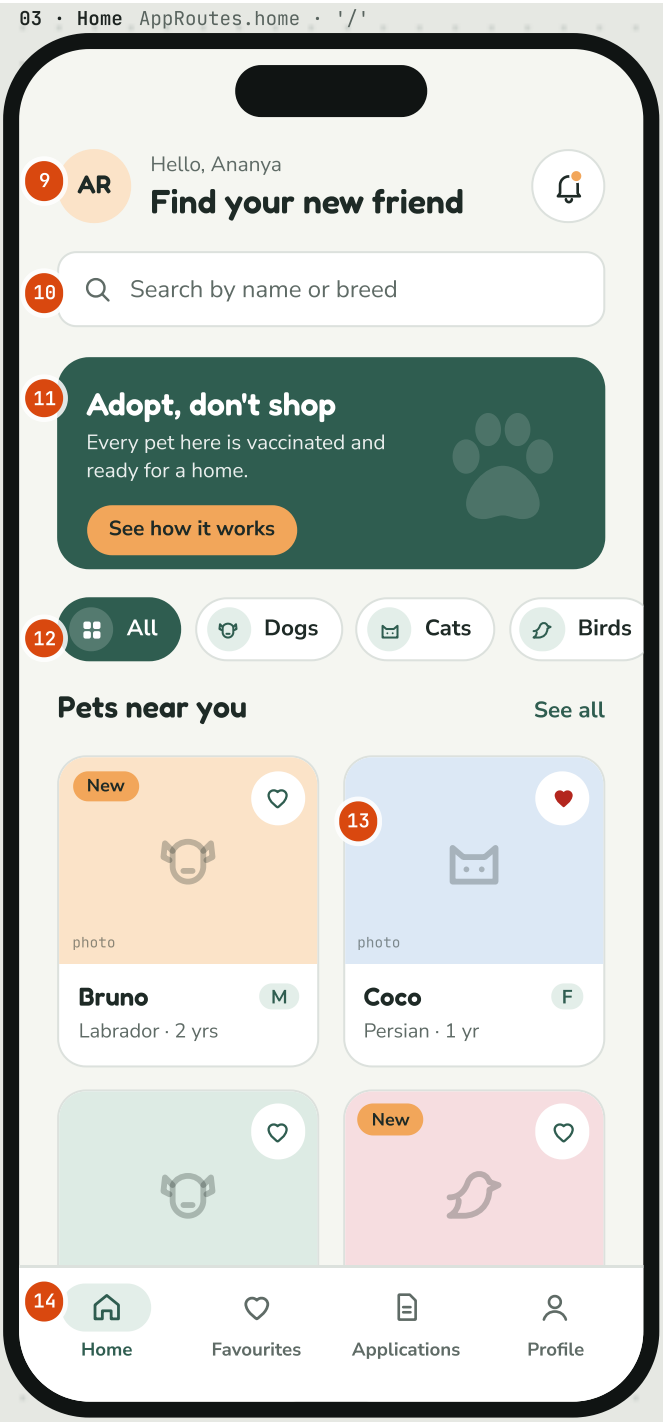

Paws & Homes: Login and Home

Two screens to build in Flutter, with a third artboard showing the login's error state. Match the colors, fonts, sizes and spacing below. Every value is given in Flutter units (logical pixels).

Frame **390 × 844** (iPhone 14 / Pixel 7 size) Fonts **Fredoka** + **Nunito Sans** Grid **4 px**

Side padding **24**

Spec notes

The numbers match the orange pins on the canvas.

1 **Logo**

72 × 72 box, radius 22, primary fill, white paw icon 38. Starts 96 from the top of the screen (inside `SafeArea` that's about 40 below the status bar).

2 **Title and subtitle**

“Welcome back”: Display 30 / SemiBold, 28 below the logo. Subtitle: Body 15, muted, 6 below.

3 **Text fields**
Label 13 Bold, 6 above the box. Box height 52, radius 12, border 1.5 line color, prefix icon 20. Fields are 18 apart. Side padding 24 on the whole screen.

4 **Focused field and password toggle**
Focused border 2 px primary, prefix icon turns primary. The eye icon toggles `obscureText`.

5 **Primary button**
Full width, height 54, fully rounded (radius 27), primary fill, Display 17 SemiBold. 24 below “Forgot password?”.

6 **Divider and secondary button**
“or” with lines either side, 22 above and below. Outlined button: same size, 1.5 px primary border, primary text.

7 **Error state**
Border 2 px error red, prefix icon red. Message under the field: 12.5 Bold, error red, with an alert icon 14. Use the exact messages shown.

8 **Loading state**
When both fields are valid: disable the button, show a white 22 px spinner inside it for 1.5 s (`Future.delayed`), then go to Home.

9 **Greeting row**
Avatar 46 circle with initials. “Hello, Ananya” Body 13 muted; “Find your new friend” Display 21. Notification button 46 circle, white, 1 px border, accent dot 9.

10 **Search field**
Same style as the login fields, without a label. Optional for this practice: filtering by name is a bonus.

11 **Banner**
Radius 20, primary fill, padding 18. Title Display 20 white, body 13. Pill button: accent fill, dark text 13 Bold, radius 16. Large paw at 14% white in a `Stack`.

12 **Category chips**
Height 40, radius 20, 8 apart, horizontal scroll. Icon in a 28 circle. Selected: primary fill, white text. Unselected: white fill, 1 px line border.

13 **Pet cards**
2-column `GridView.builder`, spacing 14. Card radius 18, 1 px border. Photo 128 tall with a `Stack`: “New” tag top-left, heart button 34 top-right (filled red when favourite). Name Display 16, gender pill, breed and age Body 12.5 muted.

14 **Bottom navigation**
Material 3 `NavigationBar`, white, 4 destinations. Selected icon sits in a primary-soft pill. Only Home needs to work for this practice.

Colors

Primary
Buttons, selected chip, banner
`Color(0xFF2F5D50)`

Primary soft
Icon circles, nav pill, gender pill
`Color(0xFFE3EEE9)`

Accent
“New” tag, banner pill, notification dot
`Color(0xFFF2A65A)`

Background
Scaffold background
`Color(0xFFF5F6F1)`

Surface
Fields, cards, nav bar
`Color(0xFFFFFFFF)`

Text
Headings and body
`Color(0xFF1E2A26)`

Muted text
Subtitles, placeholders, icons
`Color(0xFF5F6B66)`

Line
Borders and dividers
`Color(0xFFDCE1DD)`

Error
Field errors, filled heart
`Color(0xFFB3261E)`

Typography

Download **Fredoka** (SemiBold 600) and **Nunito Sans** (Regular 400, Bold 700) from Google Fonts, put the .ttf files in `assets/fonts/` and register them in `pubspec.yaml`, as in Session 3.

STYLE	FONT	SIZE	WEIGHT	FLUTTER TEXTTHEME	USED FOR
Display	Fredoka	30	600	`headlineMedium`	“Welcome back”
Title	Fredoka	21 / 20 / 19	600	`titleLarge`	Greeting, banner, section headings
Button	Fredoka	17	600	`labelLarge`	Primary and outlined buttons
Card name	Fredoka	16	600	`titleMedium`	Pet name
Body	Nunito Sans	15	400	`bodyLarge`	Subtitle, field text
Label	Nunito Sans	13	700	`labelMedium`	Field labels, chips, links
Small	Nunito Sans	12.5	400 / 700	`bodySmall`	Breed and age, errors, terms

Spacing and corners

Spacing scale

VALUE	WHERE
6	Field label to box, title to subtitle
8	Between chips
12	Inside the greeting row, field to “Forgot password?”
14	Between pet cards
18	Between fields, between Home sections
24	Screen side padding, above the primary button
28 / 32	Logo to title / subtitle to first field

Corner radius

RADIUS	WHERE
12	Text fields
18	Pet cards
20	Banner, chips
22	Logo
27 (stadium)	Primary and outlined buttons
circle	Avatar, icon buttons, heart button

Components and states

TEXT FIELD

default

name@example.com

focused

ananya.rao@

error

ananya@gmail

Enter a valid email, like name@example.com

BUTTONS

Log in

primary, loading (disabled)

outlined

Create an account

How the screens behave

Login

- Use a `Form` with `GlobalKey<FormState>`. Email must be a valid format. Password must be at least 8 characters.
- The eye icon shows and hides the password with `obscureText` and `setState`.
- When both fields are valid, show the loading spinner for 1.5 seconds, then open Home with `Navigator.pushReplacementNamed(context, AppRoutes.home)`. `pushReplacementNamed` removes the login screen, so the back button doesn't return to it.
- “Forgot password?” and “Create an account” can show a SnackBar saying “Coming soon” for now.
- There's no real account check yet. Real sign-in with Firebase comes in Session 8, and this same screen will be reused.

Home

- The greeting shows the part of the email before `@`, with a capital first letter. Send it to Home as the route's `arguments`, or keep it in a Riverpod provider if you've done Session 5.
- Category chips filter the grid. The heart toggles a favourite. Keep both in Riverpod providers if you've done Session 5.
- Tapping a pet card opens the Pet detail screen from the Paws & Homes brief.
- Wrap the body in `SafeArea` and make it scrollable, so nothing overflows on a small phone or with large text.

Theme starter

Put this in `lib/theme.dart`. Every color and font on the screens should come from here, never from `Colors.xxx` in a widget.

```dart
import 'package:flutter/material.dart';

const _primary = Color(0xFF2F5D50);
const _ink = Color(0xFF1E2A26);
const _line = Color(0xFFDCE1DD);

ThemeData buildPawsTheme() {
  final colors = ColorScheme.fromSeed(seedColor: _primary).copyWith(
    primary: _primary,
    onPrimary: Colors.white,
    primaryContainer: const Color(0xFFE3EEE9),
    secondary: const Color(0xFFF2A65A),   // accent
    onSecondary: _ink,
    surface: Colors.white,
    onSurface: _ink,
    onSurfaceVariant: const Color(0xFF5F6B66), // muted text
    outlineVariant: _line,
    error: const Color(0xFFB3261E),
  );

  OutlineInputBorder border(Color c, double w) => OutlineInputBorder(
        borderRadius: BorderRadius.circular(12),
        borderSide: BorderSide(color: c, width: w),
      );

  return ThemeData(
    colorScheme: colors,
    scaffoldBackgroundColor: const Color(0xFFF5F6F1),
    fontFamily: 'NunitoSans',
    textTheme: const TextTheme(
      headlineMedium: TextStyle(fontFamily: 'Fredoka', fontSize: 30, fontWeight:
FontWeight.w600),
      titleLarge: TextStyle(fontFamily: 'Fredoka', fontSize: 21, fontWeight: FontWeight.w600),
      titleMedium: TextStyle(fontFamily: 'Fredoka', fontSize: 16, fontWeight: FontWeight.w600),
      labelLarge: TextStyle(fontFamily: 'Fredoka', fontSize: 17, fontWeight: FontWeight.w600),
      bodyLarge: TextStyle(fontSize: 15),
      labelMedium: TextStyle(fontSize: 13, fontWeight: FontWeight.w700),
      bodySmall: TextStyle(fontSize: 12.5),
    ),
    inputDecorationTheme: InputDecorationTheme(
      filled: true,
      fillColor: Colors.white,
      contentPadding: const EdgeInsets.symmetric(horizontal: 14, vertical: 16),
      enabledBorder: border(_line, 1.5),
      focusedBorder: border(_primary, 2),
      errorBorder: border(const Color(0xFFB3261E), 2),
      focusedErrorBorder: border(const Color(0xFFB3261E), 2),
    ),
```

```
    filledButtonTheme: FilledButtonThemeData(
      style: FilledButton.styleFrom(
        minimumSize: const Size.fromHeight(54),
        shape: const StadiumBorder(),
      ),
    ),
    outlinedButtonTheme: OutlinedButtonThemeData(
      style: OutlinedButton.styleFrom(
        minimumSize: const Size.fromHeight(54),
        shape: const StadiumBorder(),
        side: const BorderSide(color: _primary, width: 1.5),
      ),
    ),
  );
}
```

Register the fonts with these family names in `pubspec.yaml`:

```
  fonts:
    - family: Fredoka
      fonts:
        - asset: assets/fonts/Fredoka-SemiBold.ttf
          weight: 600
    - family: NunitoSans
      fonts:
        - asset: assets/fonts/NunitoSans-Regular.ttf
        - asset: assets/fonts/NunitoSans-Bold.ttf
          weight: 700
```
